Summary

Data Scientist with 3+ years of experience in Statistics, Feature Engineering, Jupyter. Uses statistics and machine learning to turn large datasets into predictive models and business insight.

Skills

Technologies: Statistics, Feature Engineering, Jupyter, Machine Learning, Gradient Boosting, Pandas, NumPy, Linux, Agile, SQL, Communication

Experience

Data Scientist, CodeCraft Jul 2023 - Jan 2025

- Participated in code reviews, sprint planning and daily stand-ups
- Developed a customer churn prediction model using Statistics, improving retention targeting precision by 34%
- Presented model insights to leadership and partnered with product teams to act on them
- Optimised model inference using quantisation and batching, cutting GPU cost by 43%

Applied Scientist, Accenture Nov 2021 - May 2023

- Performed exploratory data analysis on 16M+ records with Gradient Boosting to uncover drivers of revenue growth
- Investigated and resolved production issues, improving stability by 10%
- Automated reporting notebooks using Statistics, saving the team 56 hours per week

Education

M.Sc in Mathematics, BITS Pilani 2022 - 2024

B.Com, Pune University 2018 - 2022
